VISION**

ACCOUNTS RECEIVABLE

Joseph Callahan, Guy Gooselaw, and John Keane

ACCOUNTS RECEIVABLE

Overview

- ◆ Separate module from VISION
- ◆ 90+ installations
- ◆ Two versions: local and consolidated
- ◆ How AR and VISION co-exist
 - Benefits of modularity
 - A/R Transfer
 - Branch AR transfer
 - Mandatory version update

ACCOUNTS RECEIVABLE

Main Functions

- ◆ Load transactions
- ◆ Record payments
 - Manual, Batch, Lockbox
- ◆ Track open items
 - Manual, VSP payment file, CSV
- ◆ Discount Calculation
- ◆ Statement Generation
 - -Paper, email, PDF
- ◆ Registers & Reports

ACCOUNTS RECEIVABLE

Developments

- ◆ Batch payment entry
- ◆ Stringent handling of applied cash
 - Can't delete payment with applied cash
 - Must un-apply cash from transactions and payments
- ◆ Past Due Notices
- ◆ Open item import and export
- ◆ Reports and exports
- ◆ Statements output

ACCOUNTS RECEIVABLE

Configuration

- ◆ Finance Charges
 - Default rate and range
- ◆ Discounting
 - Many options
- ◆ Statements
 - Type should be F
- ◆ Apply Credits to Previous Balance
- ◆ Days to Keep Open Item
- ◆ Payment Authorization

IMPORT / EXPORT OPTIONS

External Systems

- ◆ DVI's Accounts Receivable module is designed to meet the specific needs of optical lab billing and tracking payments and discounts
- ◆ Different options to import payments and export balances have been developed to accommodate external systems, usually larger ERP systems or generic banking files
- ◆ Lockbox Payment processing

IMPORT / EXPORT OPTIONS

SpecCheck™

- ◆ SpecCheck's A/R tools:
 - Handles payment information
 - Schedules and processes payments
 - Delivers importable payments
 - Tracks current and aging balances
 - Makes pdf invoices and statements available online
 - Interfaces with Quickbooks Online
- ◆ Setup requires coordination between DVI and SpecCheck™

IMPORT / EXPORT OPTIONS

SpecCheck™

◆ What it looks like:

- Statement Inquiry
- Payments → Batch Payments
- Download Payments

◆ Imports all payments made since the last time downloaded payments were posted

STATEMENT CREATION OPTIONS

Several statement functions can be accessed directly from within the Statement Inquiry program <Accounts Receivable,2>

- ◆ PDF Statements
 - Statement creation to specified directory via command-line option (work with DVI)
- ◆ Printed paper statements
- ◆ Emailed statements
- ◆ The View Statement option displays current statement, or statement from previous periods
 - PDF Viewer is required

04/05/24		FURRER ROBIN	363885	SP53

STATEMENT CREATION OPTIONS (CONT.)

Breakdown of three options:

- ◆ **Create PDF statement:** generates pdf versions for all accounts in AR\STATEMENTS folder
 - Available to external platforms (e.g. secure account portals on lab's website)
- ◆ **Print paper statements:** generates traditional paper statements, sent to printer
- ◆ **Send statement emails:** generates pdfs to \vision\stmtpdf folder, followed by a prompt to send them
 - Replaces previous two-step function

HANDLING PRE-PRINTED FORMS

Does your lab use pre-printed forms?

- ◆ In the non-postscript era, all statement generation options use the customized statement form <5,4,1, Statements>
- ◆ Emailed statements use this form
- ◆ If using pre-printed forms that have existing company logo and address, a new filter option can suppress information if account has a printed statement
- ◆ Prevents inclusion of logo and address info from statement form onto pre-printed form

The screenshot shows a software interface with a pre-printed form and a filter definition window. The pre-printed form features the Digital Vision logo and address: 6805 SE MILWAUKIE AVE, PORTLAND OR 97202, (503) 231-6606, www.thedvi.com. The filter definition window is titled "Filter Definition" and contains the following information:

Filter Name: Email = Yes
Description: Includes logo graphic on emailed statements - but not on printed

Job Inclusion Criteria:

	Data Type	Operator	Value(s)	Eye(s)
1	Emailed Statements	=	TRUE	
2				
3				

Filter Result: Yes

PAYMENT-FILE IMPORT OPTIONS FOR OPEN-ITEM ACCOUNTS

Import payment files from CSV file

- ◆ VSP/Eyefinity™ is the traditional model for open-item accounting
- ◆ Open item accounts pay by invoice vs. statement. Keeping track of which invoices have been paid vs. those which are outstanding can be challenging
- ◆ A file listing transaction and payment amounts can be imported. Cash is applied and reconciled against unpaid invoices, marking as paid, over-paid, or under-paid
- ◆ Any account that pays by invoice can be configured for open-item. Those accounts can supply payment files in a CSV format
- ◆ DVI can provide layout and assistance
