Misc2

OK Cancel

- Expanded Email Notifications
  - Account emails configured via the account master email list using @N email type
  - Specified on MTP (Mail-to-Patient) work using the MISC1 and MISC2 fields
  - Day end WIP reports now include tracking numbers if present
- Ability to optionally strip MTP phone numbers

2

## New Integrations

- USPS via the Stamps.com desktop application

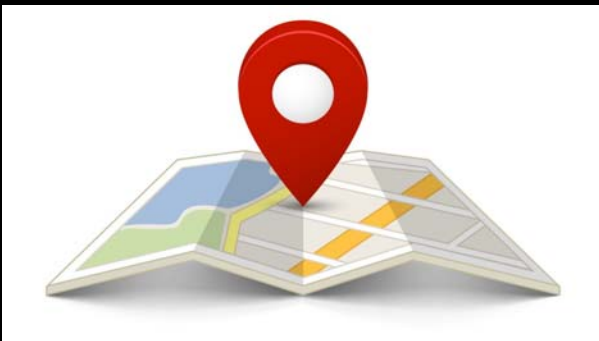

- FedEx via the FedEx Ship Manager desktop application

3

## Address Validation

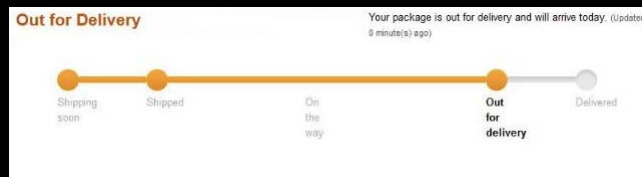

- Uses UPS validation tools to validate shipping addresses against the standard USPS address database
- MTP addresses verified directly in Rx Entry
- Customer Master address audit mode to verify account addresses

4

## In-process Tracking Number Import

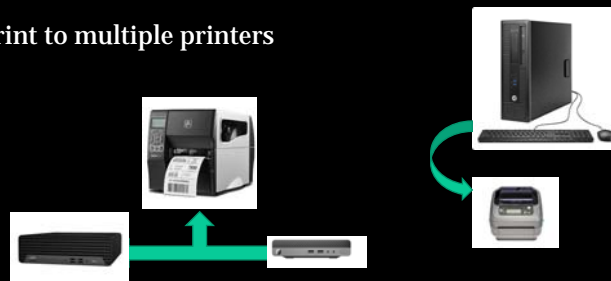

- Combobulator imports shipment tracking every 10 minutes
  - Formerly only imported at day end during Cycling
  - Tracking numbers visible in <21> Work-In-Process program for in-process work
  - Tracking numbers appended to the bottom of WIP status reports.

5

## Multiple Station Support

- Potential simplification for high-volume mail-to-patient environments
- Allows mailing labels can be printed from multiple remotes
- Multiple instances of UPS Worldship or FedEx Ship Manager can run simultaneously
- One instance of Stamps.com can print to multiple printers

6

## Label Creation Modes

- Traditional first-job invoice time
- Ship Room logging
  - Label created
  - Estimated weight capability based on Job Type, or actual weight from supported USB Scales
  - Adds packing list to shipment
  - Generates a sequence number for tighter tracking number integration
